## Injury Report Form v. 1.0

This form is to be used by handlers to report injuries or suspected injuries sustained by their dogs during agility trialing or training. Data from this form will be used to compile statistics on dog injuries relative to agility performance and equipment standards. Trends in injury type may be used by the Board of Directors to guide changes in equipment design and construction specifications and other issues of safety.

- Please report injuries in a timely fashion.
- Please provide as much supporting information as possible. This can include photos of the injury, veterinary reports, video of the run in question, links to YouTube uploads, images of any equipment involved, and so on.
- You may use this form to submit a report on a suspected injury that did not require veterinary or other professional intervention (e.g. a scrape that did not require sutures, or a torn nail that responded to home treatment).
- Please DO NOT use this form to report injuries related to dog aggression (instead, use the Trial Incident Form).
- Please DO NOT submit third party reports. Limit the use of the form to injuries or suspected injuries sustained by your own dog, or a dog that you were handling when the injury occurred.
- Please fill out as much of the form as you can. If your dog's treatment or recovery is not yet complete, please provide follow-up information, as available.

**PLEASE NOTE:** This is a fillable form; click on the shaded area to enter text, or to choose one of the available options from the drop-down menu. When you are done, save the document and e-mail it to; [dogsonthego@eastlink.ca](mailto:dogsonthego@eastlink.ca), along with your supporting information and/or questions.

Handler Information	
Name:	AAC Membership Number:
Street Address 1:	Years competing (any venue):
Street Address 2:	Email address:
City:	Province/State:
Country:	Postal Code/Zip:
Home Phone:	Cell phone:
How may we contact you to follow-up?	

Dog Information			
Name:		AAC Dog ID Number:	
Breed or Mix:			
Height at the withers :	Weight (Lbs):	Age (years):	Gender:
Body Condition Score: 1 (emaciated) (see <a href="#">dogBodyConditionScoring.pdf</a> for more information, right click, open new tab)			
Usual Competition Jump height (Inches):		Jump Height when Injury Occurred (inches):	
Years competing (any venue):	Highest title (any venue):		Average Trials per Year:
Approx. Hours/week spent in agility training:		Approx. Hours/week spent in any training:	
Pre-existing medical conditions, if any (e.g. Hip dysplasia , hypothyroidism)?
