

# Agility Association of Canada

## Equipment Checklist, 2018 jump heights

### **Introduction:**

The Agility Association of Canada requires that all equipment used at sanctioned events be inspected and approved *at least four months* before a host's first trial, and regularly (no less than every FIVE YEARS) thereafter. Any new equipment purchases or replacements must also be inspected before a trial.

***This checklist is to be used for approval of any 2018 specification wickets or measuring device ahead of the mandatory 1 January 2018 implementation date.***

Please note that trial hosts must contact their Regional Director with any questions about the inspection process, and to organize any equipment inspections. Prospective inspectors must contact the club's Regional Director for information on the process and the items required to conduct the inspection.

### **Inspector:**

Name (print): \_\_\_\_\_ AAC Number: \_\_\_\_\_

Position within the AAC: \_\_\_\_\_

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

### **Host Club:**

Name: \_\_\_\_\_ Club Number: C- \_\_\_\_\_

Club Representative: \_\_\_\_\_

Trial Site: \_\_\_\_\_

### **Other Clubs Using This Equipment:**

Name: \_\_\_\_\_ Club Number: C- \_\_\_\_\_

Name: \_\_\_\_\_ Club Number: C- \_\_\_\_\_

## Measuring Device

### Equipment Notes:

- Minimum Required: One of either a set of wickets, or a measuring device that provides an exact measurement.
- There is **ZERO VARIANCE ALLOWED** on the measuring device readings or the wicket dimensions.
- There must be a provision for a level surface no higher than 12", and large enough that even the tallest dog may stand comfortably.

| Specification    |  | Acceptable?  |
|------------------|--|--|
| Measuring device | The device scale must read in inches.  |  |
|                  | The measuring arm must be level and parallel to the ground.  |  |
|                  | The measuring arm must be long enough to reach over even a large dog to make contact with the withers area.                  |  |
|                  | The vertical scale must be perpendicular to the ground.  |  |
|                  | The device must be stable in use.  |  |
| Wickets          | May be constructed of wood, metal, PVC, or other sturdy, rigid material.   |  |
|                  | Each wicket should be wide enough to comfortably span the dog.   |  |
|                  | The following heights, as measured from the ground to the bottom of the horizontal bar, are required: 12", 15", 18" and 22". |  |
|                  | A 23" wicket is optional.  |  |
| Comments         | Wicket:  | Measuring Device:  |
